# Debt Ceiling and Debt to 2033: Political/Economic Scramble

- Things to consider:
- What do recent political events mean for US Treasuries?
- Deal gets done, what changed?
- Lingering effects
  - Financial market flinching
  - Interest rate volatility
  - Another piece of uncertainty for businesses and households
  - More links of political and economic cycles

#### Federal Reserve Philadelphia Forecast, Survey of Professional Forecasters These data are from May 2023

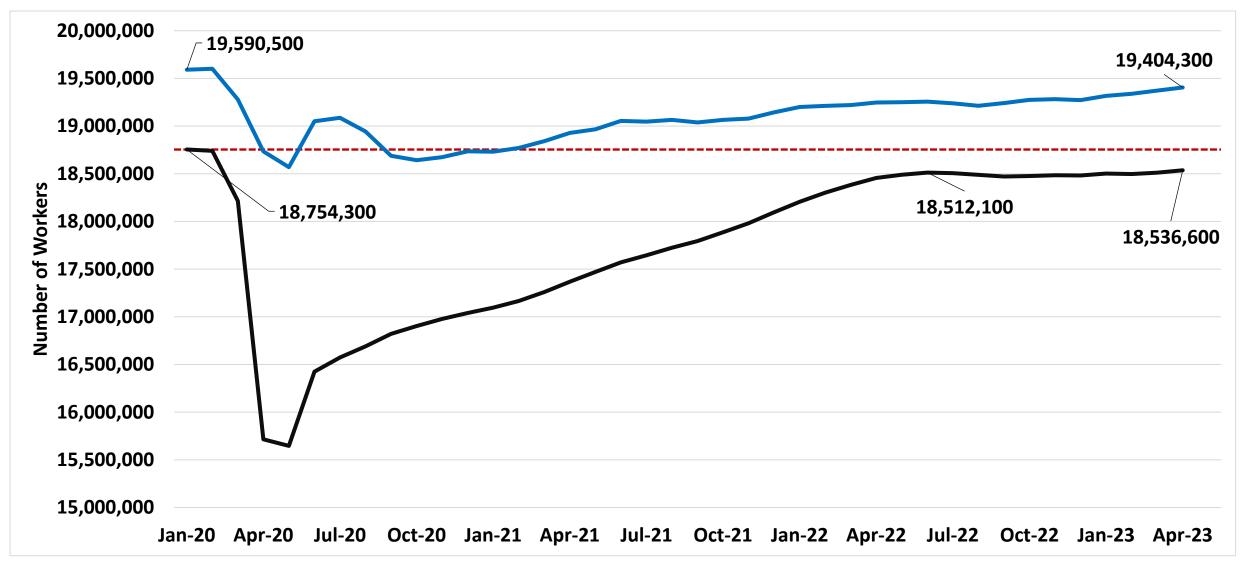

**Bottom Line:** Economy slower now through 2024, as lingering inflation and relatively high interest rates spread costs over next two years minimum

	Real GDP (%)		Unemployment Rate (%)		Core PCE Inflation (%)

# Thinking Forward

- Economic slowdown continues: waiting for jobs losses if coming
  - Debt politics and uncertainty, still could create a problem
- Economic development: renewable energy
  - Products, science and manufacturing
  - Is this where small suburban and rural California can compete for tech?
- Things to watch
  - Housing price resilience may be supply as much as demand
  - Our rural downtowns and local merchant survival
  - Inflation fading, but slowly
  - Presidential election just 'round the bend

# Thanks for attending.
